

DISH Network customers with **ViP622™ HD DVR** receivers can now access new IP-based features by connecting to a broadband home network.

To learn more about how to connect your ViP 622 receiver to your existing broadband home network go to: http://tech.dishnetwork.com/departmental_content/TechPortal/images/pdf/tech/HomeNetworkInstallGuide.pdf

Internet-connected ViP 622 receivers can download movies to the hard drive through the receiver's Ethernet connection. This IP-based Video on Demand (IP-VOD) service provides an extensive collection of pay-per-view titles, both new releases and past favorites.

To access this feature, select the **DISH On Demand** tab from the main menu (or hit your remote's **DVR button**), and then select the **DishONLINE** tab.

How TV Entertainment Works

- 1 Press the DVR button on your remote and select "TV Entertainment" from the menu screen.
Please note: *This screen will vary depending on your receiver model.*
- 2 Select the program of your choice from the menu.
- 3 Select Start to begin viewing.

Press the "DVR" button on your remote and experience TV Entertainment On Demand now!

How Movies On Demand Work

- 1 Press the DVR button on your remote and select "Movies and More" from the DISH On Demand menu.
Please note: *This screen will vary depending on your receiver model.*
- 2 Select a movie from the "Now Showing" or "Featured Movies" listings from the "Event Info" screen.
- 3 Highlight the "Rent" button. Then press "Select".

Press the "DVR" button on your remote and experience Movies On Demand now!
