

FOR IMMEDIATE RELEASE

Gulf Shores Area Service Provider, SmartResort, now Beyond Communications

Connexion Technologies' service provider adapts to bring enhanced services to area customers

Cary, North Carolina, October 23, 2009 – Connexion Technologies announced today that one of its service provider partners, SmartResort, will now be known as Beyond Communications, throughout all locations where it provides voice, video and data services to its customers. Under this name, Beyond Communications has been serving thousands of customers nationwide. Beyond Communications will also be expanding its service offerings in all locations where SmartResort is operating. SmartResort customers will not experience any service interruptions and will enjoy enhanced services and support after the transition.

“We anticipate subscribers enjoying an even more robust selection of service offerings, backed by some of the most comprehensive support in the industry,” said Michelle Stancil, Connexion Technologies’ vice president and general manager of the Gulf Coast region. “This transition will enable residents to experience even more of the benefits that their communities’ fiber-optic networks offer.”

Connexion Technologies selects service providers like Beyond Communications to deliver telephone, television and/or Internet services to communities throughout the Gulf Coast. Connexion Technologies is not a service provider, but rather it owns and manages a community’s telecommunications network. It then leases the network to service providers to deliver entertainment and communication services.

In addition to services such as digital television, IPTV, and video on demand, Beyond Communications plans to offer television-based file transfers, instant messaging, and Internet Radio. In the future, fiber-optic technology combined with an IPTV platform will help Beyond Communications bring even more advanced services to residents.

Beyond Communications will begin transitioning customers during the next billing cycle. Customers can expect to see more information delivered in the coming weeks. For more information about Beyond Communications, please visit www.discoverbeyond.com.
